

MAD CITY.

**INTERNATIONAL HAPPENING
OF URBAN PLANNING, RIGA 2017**

**JUNE 1-2, 2017
RIGA, LATVIA**

*Urban planning happening - it is a novel and unconventional approach to the form and content of a large-scale event allowing the participants, over the course of two days, to actively listen and converse, establish contacts and create new ideas. A happening is simultaneously a cultural, scientific, artistic and business event (not to be confused with an ordinary conference). It draws attention to the individual and collective experience, sensations, feelings, active participation. Some substantive and emotional framework is given - experts' presentations and various performances that facilitate the process of thought exchange and exploration - yet specific results depend on participants' cooperation and random coincidences at the given time and space.
